

Medical, Defence & Aerospace Technologies

Low to medium volumes
Over 2 decades of successful industry partnerships

Specialised Engineering Solutions

- Complete Project Management
- Design for manufacture
- Prototyping
- Process Design & Validation to meet regulatory requirements
- Risk Management (FMEA)
- FOA (First off Article)

Assembly and Testing

- Complex assembly and testing
- Class 2 and 3 medical devices
- Cleanroom (ESD environment)
- Microscopic inspection
- IPC standard soldering

Quality/Business Management System

- ISO 9001:2000 and ISO 13485:2003
- Integrated business management software
- Configuration and Change Control
- Document and Record Management
- Serial # Traceability

Precision Engineering & Machining Facility

- CAD/CAM
- Reverse Engineering
- CMM coordinate measuring machine
- 3D and 5-Axis CNC Machining
- Exotic material machining
- Optical Inspection

Precision Injection Moulding

- Low to medium volume
- Intricate & complex geometry components
- Over-moulding of electronic components
- 2K moulding (Simultaneous Multi Shot Moulding)
- Extensive experience in moulding
- Engineering Polymers
- Robot system combining injection moulding and part handling
- Ultrasonic welding
- Vision assisted Assembly & Inspection
- Technical Rubber component manufacture
