

OCV - Helping Riviera Become Lighter, Stiffer, Tougher, Stronger.

OCV Reinforcements, part of Owens Corning's Composite Solutions Business, is a new, global reinforcements actor bringing together two pioneers in the reinforcements and composite fabrics industry, each with long histories of product innovation and customer focus.

CCP/Cray Valley are leaders in resin and gelcoat production worldwide with a strong focus on innovation, research and development.

Representing these global leaders in Australasia is OCV Distribution (OCV) who has been a proud supply partner of Riviera Marine over four years, following their successful introduction, development and continued expansion of a closed molding process.

Riviera trust marquee OCV products Multicore reinforcements, RIVA resin, 224 catalyst and a Ciject One injection machine in this process. The business has broadened over the years to include supply of gun rovings, chopped strand mat, vinyl ester barrier coat and tooling gelcoat, as well as several other industry benchmark products.

All supply is supported by local sales and technical teams as well as the full complement of OCV Reinforcements' and CCP/Cray Valley's resources.
